Dec 2025 - Present

Noida, India | Promoted from Trainee SWE (Jul 2025) to Associate SWE (Nov 2025) to Software Engineer (Dec 2025)

- Serve as primary frontend and mobile engineer across six production applications: React Native Creator App (iOS and Android), Creator Web PWA, Brands Web (React), Next.js marketing site, and two Spotlyt apps (Next.js and React Vite).
- Led the React Native upgrade from 0.70 to 0.82 for the production mobile app across iOS and Android.
- Built and shipped a Next.js marketing site generating approximately 70,000 dynamic pages using SSG and ISR, delivered in about one week.
- Own CI/CD pipelines, OTA updates via Revopush, production-hardened Sentry monitoring, and App Store / Google Play release management.
- Expanded the portfolio from 3 to 6 applications while maintaining Redux-based state architecture across the original products.
- Mentor a frontend intern on the Brands React application, covering code reviews and delivery practices.

Data Science Intern, DivSriVin Technologies

Internship

- Built a machine learning model for customer churn prediction, covering data cleaning, feature engineering, model training, and evaluation.
